Tip of the Month

Follow Ed Avena's example and help anyone you can to become involved in our great hobby, especially the youngsters who will have a hobby for life, and the oldsters looking for something to do after retirement. It will keep them young and vital and give them a reason to spend more time with their Grandchildren, and the opportunity to meet the best and friendliest people on the planet.

For Sale

1. 84" Flybaby built from a Dynaflite Kit, added flaps, Solartex fabric, 3 pc wing for easy transport, set up for an OS 1.60 twin but a good 1.20 4Cycle would do the job (have a spare cowling, new) low time, great shape, \$300.00 W/O engine OBO. The 1.60 twin is available but would not be cheap!
 2. 52" American Ace, a 1940 Henry Struck FF design built from plans with 3 channel RC assist, Fox .15 power, a real floater. \$150.00 OBO.
 3. World Models "Groovy 90" pattern plane. Due to pilot error, the fuselage is broken just aft of the wing. Virtually unrepairable, but if you think you are clever enough to repair it, I'll give the airplane (minus engine and other onboard stuff); otherwise the trash man gets it. Wing and tail are undamaged.
